Subject: Fw: Question about Data Collection/Management Systems for Dimock, PA

Kelley,
Just wanted you to know about OEI's request.
Cindy

Hi Monica - hope you are doing well. Cindy Caporale is more knowledgeable about our LIMS, Scribe, and other data systems used for managing data for Dimock. Other contacts include Terry Smith, HQ OEM, 202-564-2908, and OSC for the project, Rich Fetzner, 215-341-6307. Hope that helps.

Subject: RE: Question about Data Collection/Management Systems for Dimock, PA

Hi Cindy,
I received this question from ORD regarding the data collection or data management systems being used in Region 3. Steve is particularly interested in the system that was used for the Dimock, PA hydraulic fracturing samples. May I give him your name and number for more information?

Hi Monica,
I'm the project QAM for the hydraulic fracturing study based here in ORD, and am interested in what data collection or management systems are principally used for water testing in Region 3, and, more specifically, for the Dimock PA fracking sampling sites. I thought you may have some insight into this, or know others who do. I have heard from OEM that a system called Scribe is being used for managing data from the Dimock sampling.
Thanks for any help or insight, and hope you're doing well.
Steve
